Diabetes An Expensive Sickness- International BodyPatients Set For Free Drugs, Test At Ogbaku

Diabetes Care West Africa, Germany. Speaking through Honourable Lawrence Iroegbu, the Health Supervisory Councilor, Mbaitoli LGA. Mr Ezeani affirmed that the main Verein's objective is creation of Diabetes awareness and early detection of the sickness, supporting as much as we can, the people who already have diabetes. "Diabetes is an expensive sickness but I thank God that in Nigeria we mostly have the type 2 cases which is avoidable". "For this reason we pay particular attention in educating the People especially the sick ones so that they will see the need in avoiding the complications or the sickness/Problems that most likely follow a long and untreated high blood sugar". Our Diabetes Program is for West Africa but we are based in Togo. We can also support and/or work with you if you wish to join the rest of the world in fight against this NCD call Diabetes. We are Partners to a similar Togo Government program called "PNLMN" Speaking further, Hon. Lawrence Iroegbu stated that as part of the Diabetes Care West Africa, effort in combating diabetes, there will be free drugs and test for diabetic patients at the central School Ogbaku along Owerri Onitsha road on a date to be announced in this month of July
